

CMP-8360 Series

Low Cost General Purpose Pin Diode

Description:

The CMP-836x series were designed for several types of applications. One type of applications is attenuators, where current consumption is the most significant factor. The second type of application is switches, where low capacitance is major design factor. The typical capacitance and the total resistance are typical specifications.

At Calmos Technology, our commitment to quality components gives our customers a reliable source of RF products, which are tested at a more stringent level than our competitors. Manufacturing techniques assure that when two diodes are mounted into a single package they are taken from adjacent sites on the wafer. In cross referenced parts, we guarantee pin to pin compatibility. The various package configurations available provide a low cost solution to a wide variety of design problems.

Features:

- **Unique Configurations in Surface Mount Packages**
 - Add Flexibility
 - Save Board Space
 - Reduce Cost
- **Switching**
 - Low Capacitance
 - Low Distortion Switching
- **Low Failure in Time (FIT) Rate**
- **Matched Diodes**
- **High Thermal Conductivity for greater Power Dissipation**
